

Building a *Tutor LMS Pro*-Style SaaS on lastsaas

A six-month engineering plan to extend a Go + React SaaS foundation into a multi-tenant learning platform with course authoring, quizzes, certificates, subscriptions, multi-instructor revenue share, content drip, gamification, and AI course generation.

SCOPE OF THIS DOCUMENT

Architecture recap of the lastsaas foundation, feature decomposition of Tutor LMS (free and Pro), gap analysis, MongoDB collection diff, REST API surface, React module structure, video and media pipeline, a phased 24-week roadmap, a risk register, and open decisions for kickoff.

FOUNDATION

Go 1.25 + React 19

HORIZON

24 weeks / 5 phases

TARGET

Pro feature parity
